Stunt Upgrade Score-Comparison Worksheet

Cheerleading stunt difficulty vs. execution
Complete one worksheet per proposed change

INNOVATIVE PERFORMANCE PRODUCTIONS

ippmusic.com

Team/division: _____ **Event/scoring system:** _____

Document versions: _____ **Review date:** _____

Review item	Current version	Proposed version	Evidence or annotation
Exact skill sequence Include the entry and exit, not just the featured skill.			
Legality confirmed Record the applicable rule or official response.			
Qualifying groups and skill classifications Check quantity against the current roster.			
Base difficulty plus additional drivers Identify the specific credit that changes.			
Execution estimate or range Use dated footage and the applicable drivers.			
Raw stunt subtotal Add only values on the same raw scale.			
Incident deductions observed Record official classifications where available; flag uncertainty.			
Effect on other sections Note changed spacing, timing, or omitted content.			

Category comparison (no penalties): change in stunt subtotal = change in difficulty credit + change in execution. A negative execution change offsets part or all of the difficulty gain.

Final-score comparison: use the event's actual calculation. Establish whether scores are converted, weighted, or averaged and where deductions enter. Use ranges where the evidence is uncertain.

Decision and next review

☐ Keep the upgrade ☐ Revise one part and reassess ☐ Retain the current version / continue training
